

Separate closed hydraulic system with pump and tank. Hydraulic pump up to 55 l / min 250 bar. The tank is equipped with a custom filter and Sieve glass for oil level. The pump is easily mounted on the tractor PTO shaft and locks with quick coupling. The pump provides high oil flow already at economical speeds on the tractor. The idea is designed to take care of forestry, but can also be used on other machines.

Hydraulic unit with separate pump for PTO connection
Art.no. 04127. Separate tank with filter and pump with gearbox.
